SUMMARY

AI/LLM, software and DevOps engineer with 7+ years of experience designing, building and shipping production systems. I build autonomous AI agents and RAG pipelines (LangGraph, LangChain, OpenAI, Gemini, vector databases) on top of Python backends (Django/DRF, FastAPI, Flask), and own the AWS cloud infrastructure and CI/CD that runs them. AWS Certified DevOps engineer; remote-first, with a track record of zero-downtime migrations and scalable, secure architectures.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Bash, SQL, HTML/CSS
AI / LLM	LangGraph, LangChain, LangFlow, n8n, RAG, OpenAI, Gemini; Vector DBs: Qdrant, Pinecone, Chroma, Weaviate
Backend & Web	Django, Django REST Framework, FastAPI, Flask, Node.js, Boto3, Selenium, PyQt
Cloud	AWS (EC2, Lambda, ECS/ECR, S3, RDS, DynamoDB, VPC, IAM, Route 53, SQS, SES, ElastiCache, ALB, Elastic Beanstalk, Amplify), Google Cloud Run, Azure Container Apps, DigitalOcean, Oracle Cloud
DevOps	Docker, Kubernetes, Terraform, CloudFormation, GitHub Actions, Jenkins, AWS CodePipeline, Nginx, Apache, Linux (Ubuntu/Debian)
Databases	PostgreSQL, MySQL, MongoDB, SQLite, Redis
Search	Elasticsearch, Kibana, Logstash
Tools	Git, GitHub, GitLab, Bitbucket, Jira, ClickUp, Trello, VS Code

EXPERIENCE

Python Consultant — Youda Tech	Jan 2025 – Present · Remote
- Building AI chatbot systems and AI-powered backend services. - Designing AI agents and workflow-automation systems. - Developing AI integrations with OpenAI, Gemini, LangGraph, LangFlow and n8n. - Creating automation pipelines and scalable backend APIs. - Working with vector databases and retrieval (RAG) systems. - Deploying and optimizing AI tools in production environments. - Integrating cloud infrastructure and CI/CD pipelines for AI applications. Tech: Python, FastAPI, LangGraph, LangFlow, n8n, OpenAI API, Gemini API, Docker, AWS, Vector Databases	
Python Consultant — ARC Document Solutions India Pvt. Ltd.	Mar 2024 – Nov 2024 · Remote
- Migrated legacy enterprise systems to a modern cloud architecture. - Refactored backend services and improved application maintainability. - Modernized APIs and backend workflows. - Built scalable cloud-native solutions using AWS services. - Improved deployment pipelines and infrastructure stability. - Drove performance optimization and backend improvements. Tech: Python, Django, AWS (Lambda, EC2, S3), PostgreSQL, CI/CD, Docker	

Software Engineer — [Softuvo Solutions Pvt. Ltd.](#)

Aug 2021 – Feb 2024 · Remote

- Developed scalable Django applications and REST APIs.
- Delivered recruitment, healthcare and real-estate platforms.
- Built backend services and third-party API integrations.
- Designed AWS-based infrastructure and serverless systems.
- Implemented CI/CD pipelines and deployment automation.
- Managed production deployments, backend optimization and cloud/infrastructure automation.

Tech: Python, Django, DRF, FastAPI, AWS, PostgreSQL, Docker, Jenkins, GitHub Actions

Software Engineer — [Vistaar Digital Communications Pvt. Ltd.](#)

Jan 2020 – Aug 2021 · Mumbai

- Developed IoT-based digital platforms and backend systems.
- Managed Linux servers and deployment pipelines.
- Built automation tools and backend APIs.
- Set up CI/CD automation and infrastructure.
- Maintained production systems and deployment environments.

Tech: Python, Django, Linux, Jenkins, Docker, PostgreSQL, AWS

Associate Software Engineer — [Vistaar Digital Communications Pvt. Ltd.](#)

Aug 2018 – Jan 2020 · Mumbai

- Developed ERP systems using Django and Django REST Framework.
- Built Selenium automation and web-scraping systems.
- Developed backend APIs and internal tools.
- Assisted with deployment automation and Linux server setup.
- Worked on database design and backend maintenance.

Tech: Python, Django, DRF, Selenium, MySQL, Linux, Bash

Software Intern — [Vistaar Digital Communications Pvt. Ltd.](#)

Jun 2018 – Aug 2018 · Mumbai

- E-detailing apps (HTML/CSS/JS) ported to iOS and Android; Flutter CRUD app; IoT projects on Raspberry Pi; Alexa skills with the Python SDK.

SELECTED PROJECTS

Nexight [nexight.run](#)

AI-agent analytics platform — autonomous LLM agents (LangGraph/LangChain) with RAG over vector databases, on a Python backend deployed to Azure Container Apps.

InvoLab [involab.io](#)

Django/DRF invoicing & billing SaaS — Dockerized and deployed to Google Cloud Run via CI/CD.

Nexara [nexara.work](#)

AI-powered freelance marketplace — AI-driven talent/project matching with milestone-based escrow payments, on a Django REST Framework backend deployed to Google Cloud Run.

EDUCATION

B.E., Computer Engineering

University of Mumbai

CERTIFICATIONS

AWS Certified DevOps

Docker & Kubernetes: The Practical Guide (Udemy, 2022)
